WORKSHEET, COST AND EFFORT

InfoPath Migration Cost and Effort Estimator

A worksheet to build a defensible number: form volume, complexity mix, and rebuild hours.

A planning worksheet, reviewed August 2026, estimates are starting points

01 Effort model

Complexity band	Characteristics	Hours per form
Simple	Flat fields, no logic, no data connections.	2 to 5
Medium	Conditional sections, one data connection.	6 to 14
Complex	Multiple data connections, heavy validation, repeating tables.	16 to 40

Do triage first. Estimating before you retire dead forms inflates every number below.

02 Your worksheet

Band	Count (post-triage)	Hours each	Subtotal
Simple			
Medium			
Complex			
Total rebuild hours			
+ Power Automate logic rebuild (~25%)			
Estimated total effort
